

Responsible Grease Management

Prevent Food Solids and Liquid Food from Entering the Drain

Always Remember To:

-  Scrape food from plates and utensils into the food recycling bin before washing.
-  Place liquid foods such as dairy products, milkshakes, syrups, condiments, batters, and gravy into the food recycling bin or garbage.
-  Deposit spent fryer oil or cooking grease into the grease recycling bin or garbage.

Would you consider pouring grease and food solids directly into your local lakes, streams and rivers?

There is no difference!
